Le Thi Hong Nga

Senior Product Designer | Design Systems | Front-end | Web and Mobile

Ho Chi Minh City, Vietnam · ngalth81@gmail.com · 0908883465 · LinkedIn · Portfolio

Summary

Senior product designer with 15+ years designing web, mobile, CMS and device-embedded interfaces for international clients. Works end to end, from user flows, wireframes and interactive prototypes to usability testing, design systems and developer handoff, and implements UI in HTML, CSS, SCSS, React, Vue and TypeScript. Experienced in complex, data-heavy products and in consumer apps. Uses AI tools (Claude, Figma AI and Magnific) to speed up exploration and asset creation while keeping design decisions accountable.

Core skills

- **UX and product design:** user research, user flows, information architecture, wireframing, interactive prototyping, usability testing
- **Design systems:** Figma component libraries, variants, component properties, variables, multi-theme interfaces, design-to-code handoff
- **Front-end:** HTML5, CSS3, SCSS, React, TypeScript, Vue, Bootstrap, Material UI, Ant Design
- **Design tools:** Figma, Adobe XD, Sketch, Photoshop, Illustrator, After Effects
- **Motion and media:** Lottie animation, Premiere Pro, promotional video

Experience

Nexle Corporation · Senior UI/UX Designer and Front-end Developer

Aug 2020 – Oct 2026

- Designed end-to-end UX and UI for web, mobile and CMS products for international clients, through usability testing and developer handoff.
- Created and maintained Figma component libraries and design patterns for consistency across web and mobile.
- Designed dashboards and admin interfaces that turn complex data into clear scores, charts and workflows.
- Implemented responsive UI in HTML, SCSS, React and TypeScript; added Lottie animations for system feedback.

Robusta Engineer Design (Xuyen A Hospital project) · Senior UI/UX Designer and Front-end Developer

2019 – Aug 2020

- Designed the UI of a healthcare web application and its responsive UI system.
- Built UI components and page views in HTML/CSS and React-based technologies.

Nopegame / eKingdom · Senior UI/UX Designer and Front-end Developer

Jan 2017 – Dec 2018

- Designed responsive web, mobile, tablet and gaming experiences; ran usability tests.
- Developed responsive HTML/CSS interfaces (Bootstrap, jQuery, Vue).

Renaissance School · Head Creative Designer
May 2013 – Dec 2016

- Led creative and UI/UX design; set design direction and introduced responsive design practices.
- Planned projects, assigned tasks, coordinated with sales, management and development; managed quality and delivery risk.

Cateno (software company, Norway) · Lead Designer
May 2011 – Apr 2013

- Led UI/UX and visual design for web and mobile; coordinated with sales and management and managed project risk.

Earlier career
2006 – 2011
Web Designer, Officience (websites, SharePoint and Drupal themes). Designer, MSV Company (print, brand and web design).

Selected work

- **Lighthouse (marine navigation platform):** Redesigned the UI of a platform that combines real-time radar, instrument gauges and onboard messaging, in light, dark and night modes, keeping the existing workflows and information architecture familiar to ship operators. Redesigned the chat, map, radar and settings screens, created reusable patterns for radar, gauges, navigation controls and messaging in Adobe XD, reworked the message inbox for hierarchy and readability, and iterated with customers and developers in a Qt and C/C++ environment.
- **Poscura (posture-monitoring platform):** Researched and agreed the solution together with the business analyst team, then designed the brand, responsive landing page, mobile and desktop apps and CMS views. Turned posture data into a score, a body map and region-level detail, stated the wellness-only scope in the interface, and kept one Figma component library across mobile, desktop, landing page and CMS. Supported CMS and HTML views, and produced a brochure and an app introduction video, with AI (ChatGPT, Magnific, Google Nano Banana) supporting video and layout.
- **Limited-Time Reward Campaign (design challenge, 2026):** Designed a campaign lifecycle (Draft, Active, Paused, Ended) with guards that scale with the consequence of each action; a mobile game app with six claim states; and a desktop backoffice with a validated four-section form and a read-only ended state with an activity log. Built one Figma library with variants, color and radius variables and written usage rules. Figma, view only
- **Fit4Stream (live-event and community platform):** Designed the brand, web platform, mobile app and CMS: posts, messaging, team discussions, live streaming and stream setup, recurring events and an admin dashboard. Ran usability tests with customers, built selected screens in HTML, CSS, Bootstrap and Vue, and produced a marketing video and a brochure.
- **BeaHub (booking and management platform for spas and salons):** Designed mobile app and CMS screens, the pricing, login and support pages, five Facebook ad visuals and a tri-fold brochure; made the product videos on the BeaHub YouTube channel and the boot logo animation.
- **Smart Security (smart-home control app):** Designed a unified app for lighting, curtains, door locks and security alarms on tablet and mobile, and redesigned its map view. Built Lottie animations for state feedback (delivered as JSON), marketing videos and reusable components in Figma.
- **Videos and motion:** nearly ten app and product videos and Lottie JSON animations. BeaHub on YouTube

- **Smart Home (wall panel and mobile app), freelance project:** Designed the UX and UI and the flows: PIN entry and drag-to-arm, armed away and armed stay states with silent exit and entry-delay options, fire alarm states with a confirmation step, lighting with brightness and a color picker, room shortcuts and the mobile safety flow.
- **PowerHub (solar power monitoring platform), Nexle:** Analyzed requirements and designed a dashboard with yield figures and charts, project list and overview, single-line diagrams, inverter and meter views, alarm lists, power charts, operation reports, device management and configurable alert thresholds. Built the CMS UI in code.
- **Xuyen A Hospital (hospital operations web system):** Designed all of the UI for a web application (exam registration, cashier with insurance billing, inpatient admission, treatment and care, consultation records and a hospital list), turning business requirements into user flows, and coded the UI modules: components and page views in HTML, CSS and React-based technologies (Robusta Engineer Design).
- **Powdoc (AI document-processing platform):** Analyzed and designed the landing page, login, application layout and a Human Resource module with candidate search, a CV-to-job match score and missing and found keywords.
- **MYTHACO (internal social network for THACO employees):** Designed the web platform, mobile app and CMS: posts, profiles, following, messaging and discussion groups. Ran usability testing with customers and stakeholders, and implemented selected screens in HTML, CSS, Bootstrap and Vue.
- **Merchant Site (franchise management platform):** Designed a platform for salons, spas and cleaning businesses to manage services and bookings and keep brand standards consistent across locations: wireframes, UI, prototypes and usability testing. Built responsive HTML and CSS screens and reusable components in Bootstrap and Vue.
- **eKingdom (gaming community and marketplace):** Designed the website (not the games) with a yellow-on-dark visual style: tournament home, community feed, player blogs and a game-account marketplace with filters, in responsive web, tablet and mobile layouts. Created flows, wireframes and prototypes (Nopegame / eKingdom, 2017 to 2018).
- **Sales Profit Planner (earnings planner for real-estate sales professionals):** Designed the UX and UI and the user flows, and built the UI in code: marketing site, scenario list, create-scenario dialog and application navigation (earnings, work-related expenses, quick targets, investments, budgeted cashflow, balance sheet and charts).
- **JOY (wellness and learning app for children):** Designed the logo and identity, app architecture, flows and a child-friendly UI system. Created custom 3D characters and environments with AI-assisted workflows, designed mindfulness and gamified experiences, and built prototypes and motion-oriented interactions.
- **CigarXmeter (luxury cigar discovery platform):** Designed the logo, responsive website and mobile app: Cigar Finder, Explorer, ratings, reviews, tasting profiles and a cigar scanner flow. Built wireframes and prototypes, a Figma component library and AI-assisted 3D visuals.

Education and languages

Bachelor of Information Technology, University of Natural Sciences, Ho Chi Minh City, Vietnam. Vietnamese (native); English (strong written, capable spoken).
