SUMMARY

Senior product designer with 15+ years designing web, mobile, CMS and device-embedded interfaces for international clients, plus brand, visual and motion work. Works end to end: user flows, wireframes, prototypes, usability testing, design systems and developer handoff, and implements UI in HTML, SCSS, React and TypeScript. Creates brand identities, Facebook ads, brochures, nearly ten product videos and Lottie animation. Experienced in complex, data-heavy products and in consumer apps. Has led design teams as Head Creative Designer and Lead Designer. Uses ChatGPT, Claude, Figma AI, Magnific and Google Nano Banana to speed up exploration and asset creation, and verifies every output.

CORE SKILLS

UX and product design: user research, user flows, information architecture, journey mapping, wireframing, interactive prototyping, usability testing

Design systems: Figma component libraries, variants, component properties, variables, usage rules, multi-theme interfaces, design-to-code handoff

UI and visual craft: layout, spacing, typography, color, visual hierarchy, responsive web and mobile, state design (default, loading, error, paused, alarm)

Brand, marketing and motion: logos and visual identity, Facebook ads, brochures, landing pages, nearly ten app and product videos (Premiere Pro, After Effects), Lottie (JSON) animation, boot logo animation, AI-assisted 3D visuals

Tools: Figma, Photoshop, Illustrator, After Effects, Premiere Pro, Adobe XD, Sketch, InDesign, Lottie

Front-end: HTML5, CSS3, SCSS, React, TypeScript, Vue, Bootstrap, Material UI, Ant Design

AI: ChatGPT, Claude, Figma AI, Magnific, Google Nano Banana for ideation, user-flow and state mapping, video, layout and visual assets

EXPERIENCE

Nexle Corporation · Senior UI/UX Designer and Front-end Developer · Aug 2020 – Oct 2026
Designed web, mobile and CMS products for international clients, from wireframes to UI design to developer handoff in Figma, and implemented responsive front-end screens.

- Led UX/UI from user flows and wireframes to prototypes, usability testing and developer-ready designs in Figma and Adobe XD; worked daily with developers and product owners on technical constraints.
- Built and maintained Figma component libraries (variants, component properties, variables) so web and mobile interfaces stayed consistent and easier to build.
- Designed dashboards and admin tools that turn complex data into clear scores, charts and workflows (Poscura, Fit4Stream, PowerHub); redesigned the Lighthouse marine navigation UI in light, dark and night modes.
- Created brand and visual identity (logos, palettes, on-brand UI) for Poscura, Fit4Stream, JOY and CigarXmeter, and marketing material: landing pages, brochures, hero banners and promotional videos.
- Implemented responsive UI in HTML, SCSS, React and TypeScript, fixed visual and interaction issues directly in code, and ran usability tests and customer feedback sessions.
- Built Lottie animations and micro-interactions for system feedback (Smart Security, delivered as JSON).
- Used ChatGPT, Claude, Figma AI, Magnific and Google Nano Banana to explore ideas, organize user flows and states, and create video, layout and visual assets, including 3D characters and environments for JOY; every AI output is verified before it enters a design.

Robusta Engineer Design (Xuyen A Hospital project) · Senior UI/UX Designer and Front-end Developer · Jun 2019 – Aug 2020

- Designed all of the UI of a healthcare web application and its responsive UI system, turning business requirements into user flows, and coded the UI modules in HTML, CSS and React-based technologies.

Nopegame / eKingdom · Senior UI/UX Designer and Front-end Developer · Jan 2017 – Dec 2018

- Designed the eKingdom website in responsive web, tablet and mobile layouts; created user flows, wireframes, prototypes and visual assets, ran usability tests, and developed responsive HTML and CSS (Bootstrap, jQuery, Vue).

Renaissance School · Head Creative Designer · May 2013 – Dec 2016

- Led creative and UI/UX design across web, mobile and digital products; set design direction, introduced responsive design practices, planned projects, assigned tasks and managed design quality and delivery risk, working with sales, management and development.

Cateno (software company, Norway) · Lead Designer · May 2011 – Apr 2013

- Led UI/UX and visual design for web and mobile; coordinated with sales and management, managed project risk and introduced emerging design practices to the team.

Earlier career · 2006 – 2011

- Web Designer, Officience (Sep 2008 – May 2011); Designer, MSV Company (Feb 2006 – Sep 2008): web, print, brand, exhibition booth and interior design.

SELECTED WORK

- **Limited-Time Reward Campaign (design challenge, 2026):** a daily-reward experience designed for both sides: a player app with six claim states and a backoffice with a validated form and a campaign lifecycle (Draft, Active, Paused, Ended), plus one Figma library with variants, variables and usage rules. Explored with ChatGPT, structured with Claude, finished in Figma. Figma, view only
- **Lighthouse:** redesigned the chat, map, radar and settings screens of a marine navigation UI in light, dark and night modes, keeping operator workflows.
- **Poscura:** brand, landing page, mobile and desktop apps, CMS views, Figma library, brochure and video; researched the solution with the business analyst team; AI supported video and layout.
- **BeaHub (booking and management platform for spas and salons):** mobile app and CMS screens, pricing, login and support pages, five Facebook ads, a tri-fold brochure, product videos and a boot logo animation.
- **Fit4Stream:** brand, web, mobile and CMS for a live-event platform, with an admin dashboard, usability tests and front-end screens in Bootstrap and Vue.
- **Smart Security and Smart Home (freelance):** smart-home control apps and wall panels with clear arm, disarm and alarm states; Lottie JSON animation and marketing videos.
- **Brand and motion:** logos, five Facebook ads, brochures, nearly ten app and product videos, Lottie and boot animations. Brand and motion portfolio · BeaHub on YouTube
- **Other products:** PowerHub (solar power monitoring), Xuyen A Hospital (hospital operations), JOY, CigarXmeter, Merchant Site, MYTHACO, eKingdom, Powdoc, Sales Profit Planner.

EDUCATION AND LANGUAGES

Bachelor of Information Technology, University of Natural Sciences, Ho Chi Minh City, Vietnam.
Vietnamese (native); English (strong written, capable spoken).
